

FUTURA

High Tech Medical Suspension Castors

The Futura series represents a significant step forward in castor technology, incorporating a patented suspension system and a cutting-edge braking design.

The steel housing encloses the locking and suspension components, providing reliable protection for sensitive and valuable equipment.

The brake system is designed to act on the second layer of the tire wheel, reducing the risk of damage to the floor and leaving no dent on the tread.

These innovations make the Futura series ideal for medical diagnostic equipment that requires stability and precision in motion.

The Futura series is a top-tier solution for equipment that demands a delicate touch during transport.

Application:

High tech diagnostic medical device
Mobile device in medical application

Size available :

150mm*2

Pressed steel main body with Zinc plated finished, precision ball bearing at swivel head and wheel center. Patented suspension core provides proper shock damping function, aesthetic ABS shields and wheel covers.

Mounting P88 Neoprene wheel

TTL/Free/DL

Catis Code	 mm	 mm	 mm	Fitting	 mm	 mm	 mm	 kg
SU620P88/W	150	14	88	P88	47	204	130	100

TTL/Free

Catis Code	mm	mm	mm	Fitting	mm	mm	mm	kg
SU622P88/W	150	14	88	P88	47	204	130	100

Free Swivel

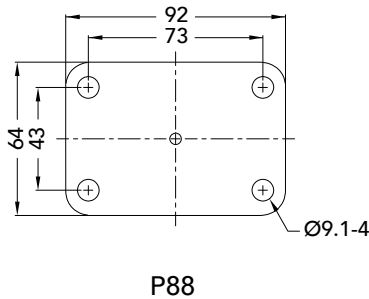

Catis Code	mm	mm	mm	Fitting	mm	mm	mm	kg
SU621P88/W	150	14	88	P88	47	204	130	100

Wheel Lock/Free
